

# HET PATEL

Email: [hetbhav@ualberta.ca](mailto:hetbhav@ualberta.ca) | Phone: (403) 383-7132 | GitHub: <https://github.com/het-patel>

## EDUCATION

University of Alberta, Edmonton, AB

Expected May 2026

*Bachelor of Science with specialization in Computing Science*

**Relevant Coursework:** Object Oriented Programming, Distributed Systems, Artificial Intelligence, Algorithms, Data Structures, Machine Learning, Low-Level Programming, Software Engineering, Data Science, Database Management, App development

## TECHNICAL SKILLS

**Programming Languages:** C, C#, Java, Python, HTML, JavaScript, Julia

**Technologies & Database Tools:** MongoDB, SQL, Visual Studio, SPSS, R, R commander, Tableau, Office, Large Language Models, Android Studio, Unity, Figma, AWS

**Soft Skills:** Leadership, Communication, Teamwork, Problem Solving, Public Speaking, Critical Thinking, Time Management

## PROJECTS

### App Development | Android Studio

- Developed Eventure, an Android application that facilitates equitable event registration using a lottery-based system, ensuring fair participation.
- Implemented QR code scanning functionality for seamless user registration directly from event posters, improving user experience and registration efficiency.
- Integrated Firebase for real-time data synchronization, cloud storage, and user notifications, ensuring seamless event management and data handling.
- Built features to notify users about their selection status and manage replacements for declined invitations, enhancing the event experience for both organizers and attendees.
- Designed a comprehensive organizer dashboard to track entrant statistics, monitor registration progress, and streamline the overall event management process.
- GitHub Link: <https://github.com/CMPUT301F24intels/intels-events>

### Game Development | Unity

- Collaborated with a multidisciplinary team of designers and developers to create Radiation Realm, a 2D arcade-style puzzle platformer with engaging mechanics and immersive gameplay.
- Designed and developed game mechanics and levels using Unity and C#, ensuring a balanced and challenging experience for players.
- Overcame technical challenges to optimize game performance and improve frame rates, resulting in smoother gameplay and enhanced player experience.
- Played a key role in shaping core game mechanics and level design, which contributed to the game's positive reception and player feedback.
- Focused on delivering an intuitive user experience while implementing creative solutions for level progression and puzzle complexity.
- Game Link: <https://madkhaf-games.itch.io/radiation-realm>

### Enterprise Data Management System

- Developed a command-line interface system for managing enterprise data in a SQLite database, integrating SQL with Python.
- The system allows registered users to log in, view their profiles, borrow and return books, pay penalties, and search for books.
- Utilized SQL commands to create and manage relational databases, ensuring consistency with the provided schema.
- Implemented user authentication and registration processes, allowing both registered and unregistered users to access the system.
- Developed functionalities for users to view their personal information, borrowing history, and penalties, and to perform book-related actions such as borrowing, returning, and reviewing.
- Integrated error-checking mechanisms to handle incorrect data entries and mitigate potential vulnerabilities, including protection against SQL injection attacks.

## CAMPUS INVOLVEMENT

### Supporting Students Affected by Conflict, University of Alberta, Edmonton, AB

July 2023 – Present

- Collaborated with the David Turpin and Suromitra Sanatani Award for Refugees and Displaced Persons to provide financial support and assistance to students attending the University of Alberta, specifically those coming from asylum countries in the Middle East and Africa.
- Played a vital role in ensuring newcomer students felt supported and welcomed as they transitioned into life on campus and in the city of Edmonton.

### Faculty Leader(Engineering), University of Alberta, Edmonton, AB

March 2024 – Present

- Acting as the first point of contact for new and returning students, ensuring a smooth integration into campus life.
- Demonstrated strong communication and interpersonal skills in interacting with diverse groups of students and answering inquiries effectively.
